Department of Microbiology

Report on
INAUGURATION CEREMONY
of Student Activity Unit (AMBER)

In collaboration with Microbiologists Society India (MBSI)

(27/08/2026)

The Department of Microbiology at Shri R. L. T. College of Science, Akola, in collaboration with the Microbiologists Society India (MBSI), successfully organized the grand Inauguration Ceremony of its Student Activity Unit, AMBER (Association of Microbiologists & Biochemists for Education & Research), for the academic session 2026–27. The program convened on August 27, 2026, at 2:00 PM in the Department of Microbiology premises under the overarching theme, *"Unveiling New Opportunities, Professional Leadership and Driving Innovation Together with Societal Impact"*. Designed to foster academic excellence, the primary objective of the event was to formally introduce the incoming student leadership team, promote research-driven innovation, and cultivate institutional and community-focused scientific leadership among undergraduate and postgraduate students.

The ceremonial proceedings commenced with a formal ribbon-cutting ceremony, officially inaugurating the student activity unit (AMBER) and activities of the AMBER student body, followed by the customary felicitation of the distinguished guests and dignitaries. The inaugural session was graced by an esteemed panel of dignitaries. The ceremony was presided by Dr. R. D. Chandrawanshi, Principal of Shri R. L. T. College of Science, Akola, who served as the chairperson of the event. The unit was formally inaugurated by Dr. V. D. Nanoty, Former chairman of Board of Studies (BoS) in Biochemistry including Microbiology at Sant Gadge Baba Amravati University (SGBAU), Amravati, Former Principal of Shri R. L. T. College of Science and Brand Ambassador for MBSI, alongside Dr. A. M. Garode, Member of the BoS in Biochemistry including Microbiology at Sant Gadge Baba Amravati University (SGBAU), Amravati. Dr. Y. S. Patil, BoS Member and Amravati University Coordinator for MBSI, honored the occasion as the Chief Guest with her presence.

The establishment and execution of the event were guided by the department's core faculty leadership, including Dr. H. S. Malpani, Head of the Department of Microbiology, and Dr. S. N. Gawande, Assistant Professor. The ceremony marked the official induction of the student executive committee, featuring Ms. Amruta Sharma as President of AMBER, Ms. Dhyaneshwari Patond as Vice President, Ms. Sanskruti Ambuskar as Secretary, alongside the newly appointed executive board members. All the core committee of student activity unit were congratulated and felicitated by dignitaries. The event witnessed active engagement from over 80 students, alongside teaching and non-teaching staff members from both the Microbiology and Biochemistry departments.

During the addressal session, the chief guest and inaugurators emphasized the indispensable role of national academic bodies like MBSI in bridging the gap between classroom curricula, high-impact research, and community service. In his presidential address, Dr. R. D. Chandrawanshi commended the faculty and students for their proactive initiative, urging the student body to leverage the AMBER platform to develop essential leadership competencies and

drive scientific solutions tailored to societal challenges. Dr. H. S. Malpani encouraged and inspired students for Student activity and its societal impact.

A major highlight of the ceremony was the academic felicitation segment, where students of the Microbiology and Biochemistry departments who achieved an outstanding CGPA exceeding 9.0 were publicly recognized and honored by the dignitaries.

As part of the event's practical commitment to public health and nutritional awareness, the department integrated the nationwide **Buttermilk Campaign** advocated by the Microbiologists Society India (MBSI). Highlighting the functional microbiological benefits of fermented dairy products, Dr. S. N. Gawande emphasized how buttermilk serves as a rich natural probiotic that enhances gut microbiome health, aids digestion, boosts immunity, and provides essential electrolytes and vitamins. To put this scientific awareness into practice, fresh buttermilk tetra packs were distributed to all participating students, faculty members, and esteemed guests, effectively combining academic celebration with healthy dietary practices.

The event successfully concluded with a comprehensive vote of thanks, expressing sincere gratitude to the college management, visiting dignitaries, faculty advisors, and student organizers whose collaborative dedication ensured the seamless execution of the inauguration.
