### Issue addressed: Environmental Consciousness

#### One Day workshop on Eco friendly Ganesha idol Preparation.

Department of Microbiology, Shri RLT College of Science, Akola in collaboration with Department of Social forestry, Nisargakatta and Microbiologist society, India have organised one day workshop on Eco friendly Ganesha idol Preparation on 6<sup>th</sup> of September 2018. Dr. R.B. Heda president of BGE Society, Akola, Adv. M.G. Mohta Hon. Secretary BGE Society, Dr. V.D. Nanoty Principal, Ms. Namrata Tale Range forest officer, Mr. Amol Sawant and Dr. H.S. Malpani Co Ordinator of event were present in inaugural function.

Organising such event is need of time as, India is country where festivals of all religions are celebrated with great enthusiasm and unity. But due to ever increasing population, few practices in these festivals create burden on environment and contribute to pollution. Ganesha festival in one of the widely celebrated events where Lord Ganesh idols are worshiped for ten days. Most of the time these idols are made by plaster of Paris (POP) which when immersed in rivers, contribute to water pollution and adversely affect water ecosystem. An attempt was made to prepare Ganesha Idols by using Shadu soil, which get dissolved easily in water after immersion. This event not only created environmental awareness but also helped students to engage themselves positively to know their own hidden talents. Around 110 participants prepared beautiful Ganesha Idols of Shadu soil which will contribute to reduce water pollution and develop environmental consciousness. Certificates were distributed to all successful participants. Dr. U.K. Bhalekar, Ms. S. N. Gawande and all teaching and non-teaching staff of college were present for event.

**Construction of Vanarai bandhara**

**Date: 17/12/2018 to 23/12/2018**

**Issues addressed: Water conservation**

For water conservation, the work of Vanarai bandhara on the Lonar canal of the adopted village Aapoti (Kd) was completed during NSS Residential Camp from 17th-23<sup>rd</sup> December 2018. Bund was constructed across a canal using gunny bags refilled with locally available soil and sand. These bags were sealed properly and arranged in the form of a wallbarrier. This is a temporary structure built across water course to collect the water as well as to reduce the velocity of stream so that infiltration rate of water increases. It helps in replenishing the aquifer below the river or canal bed resulting in increase in ground water level in the surrounding area. About 5 feet long, 8.5 feet high and 5 feet wide bandhara was constructed by NSS volunteers. While building this bandhara, the village sarpanch Mrs. Lakshmitai Ghose, Vice- sarpanch Dr. Umesh Bopate and Gram Panchayat members extended their support. The financial valuation of this Vanarai bandhara has been estimated at around Rs. 40,000 to 50,000/-. The main purpose of the construction of this bund is to conserve drinking water for all the village cattle and to conserve water for the village people.

#### BRIEF INFORMATION ABOUT THE ACTIVITY (CRITERION NO. ....)

TOPIC/ SUBJECT OF THE ACTIVITY	<b>Online Faculty Development Program on Development of E-Content</b>
OBJECTIVES	<ol style="list-style-type: none"><li>1. To provide the information and skill to teachers about the various e-content.</li><li>2. To motivate the teachers to use e-content.</li><li>3. To Promote generation of <b>e-Content</b> in all subjects</li><li>4. To make aware the teachers about various e-content &amp; how can they used in it to make their teaching-learning process more effective.</li><li>5. To make available the e-content to teachers and students through various delivery modes for formal and non-formal education, for supplementing and complementing teaching.</li></ol>
METHODOLOGY	<p>Due to the pandemic condition of cov0id-19, not only the India but the whole world stop. Nobody in his life time have seen such a dangerous situation. There is a condition of complete lockdown in the whole world. This situation affects the complete life of people. In such condition it is a duty of teacher to boost the moral of the students. But as it is complete lockdown, school and college were also closed. But how can one stop the education of the students. As from many years we are using the traditional methods of Black board for teaching it is quite difficult to switch towards the modern computerized method of teaching-learning. In view of this Shri R.L.T.College of science faculty members have took initiation to arrange one such faculty development programme for the teacher fraternity for E-content development.</p> <p>The faculty development progmaee was organized by Shri R. L.T. College from 8<sup>th</sup> June to 15<sup>th</sup> June 2020. In this programme day wise e-content activities are there, like opening of goggle account, google class, preparation of video lecture etc. Assignments were also given so that there should be liveness in the programme. Our expert faculty by their videos or direct live teaching have explained all the concept to the participants. Day wise activity was there. This six days programme help all the teacher s during the pandemic condition of corona.</p>

## Personal Equipment Protection Against covid 19

- ★ Infection prevention and control measures include, among other measures:
- ★ Hand hygiene, personal protective equipment and waste management materials.
- ★ The Protective equipment consists of garments placed to protect the health care workers or any other persons to get infected.
- ★ These usually consist of standard precautions: gloves, mask, gown.
- ★ If it is blood or airborne high infections, will include: Face protection, goggles and mask or faceshield, gloves, gown or coverall, head cover, rubber boots.
- ★ It mainly focuses on PPE usage in different areas of hospitals. But first, it is important to understand what exactly is a PPE. A personal protective equipment or a PPE is a part of complete protection gear used by any doctor or a worker during an outbreak of any disease which is transmitted quickly just like the current Coronavirus pandemic.
- ★ There are doctors and nurses who have to collect samples from the patient for testing purposes. Their PPE kit will be inclusive of goggles, N95 mask, shoe cover, two pairs of hand gloves, a water resistant gown and a hood that would cover their faces.

## Chemical Alarm

### Introduction :

1. We can make a chemical alarm just like as the fire alarm.
2. The chemical alarm consists of smell sensation or fumes recogniser to alarm the bell.
3. The chemical alarm rings the bell when the fumes or smell of chemical start to spread in lab.
4. The large chemical bottles sometimes get licked or break due to careless handling of bottles or by accidentally so the chemicals get dropped out.
5. It may cause damage or gets fired while getting in contact with other chemicals.
6. So, due to chemical alarm the laboratory accident gets reduced and also the wastage of chemical gets controlled.
7. The chemical alarm is a useful apparatus in all types of laboratories, industries, factories etc.

## Glass apparatus Cleaning brush

Introduction:-

1. We can make a cleaning brush for washing the glass apparatus of both small as well as large size.
2. The apparatus mainly used in clinical laboratories such as beakers, conical flask, round bottom flask, volumetric flask of size 100 ml, 500ml, 1000ml etc.
3. We need to clean the apparatus thoroughly so as to make perfect volume of required concentration of the solution
4. For this we need a cleaning brush.
5. The brush is made up of flexible fibers so that it gets bent according to area of glassware
6. So, we can make a cleaning brush having flexible fibers.
7. The brush contains a knob just like an umbrella.
8. For small size apparatus, the normal size brush cleans the apparatus perfectly.
9. For large size apparatus, after pressing the knob the brush opens the extra fibers just like an umbrella and cleans the apparatus perfectly
10. This cleaning brush is helpful for all college students who are performing chemical titrations, making solutions etc.

राष्ट्रीय सेवा योजनेच्या माध्यमातून रक्तदान करणे हे सामाजिक दायित्व महाविद्यालयातील प्राध्यापक व विद्यार्थी तसेच युवकांनी अंगिकारावा. तसेच रक्तदानाच्या संदर्भात ऑनलाईन व ऑफलाईन पद्धतीने जनजागृती करावी.

उपक्रमाचे फोटो काढून कार्यालयास तातडीने सादर करावा. महाविद्यालयात घेण्यात आलेल्या रक्तदान शिबीराचा अहवाल हा संचालक, राष्ट्रीय सेवा योजना, संगबाअवि यांच्या ईमेल आयडी [directornss@sgbau.ac.in](mailto:directornss@sgbau.ac.in) पर सादर करावा.

COVID-19 कोरोणाचा प्रादुर्भाव असल्यामुळे रक्ताचा तुटवडा मोठ्या प्रमाणात दिसून येत आहे. त्यामुळे “रक्तदान-श्रेष्ठदान” या संकल्पनेतून रक्तदान करणे आज समाजाला आवश्यक आहे. यामाध्यमातून प्रत्येक व्यक्ती इतरांना जिवनदान देवू शकते. हे मोठे सामाजिक कर्तव्य आपल्याला पार पाडावयाचे आहे. सामाजिक अंतर (Social Distancing) ठेवून रक्तदान करा.

चला तर मग रक्तदान करूया.... सामाजिक बांधिलकी जपूया...

## BOOK FOUNDER IN LIBRARY

### **PROCEDURE:-**

- Now a days every book contains barcode.
- Using this barcode we can implement a technique in library.
- We just save the author name, book name, barcode, shelf number etc. in computer
- Prefer to put similar subject book in one shelf.
- This list also get displayed on shelf to find out easier.
- This list also contain 1 barcode showing shelf number so as to find out book.
- When we just type the name we would find the book shelf number in one click
- And also find out whether the book is available now or issued by other.
- By using barcode machine entries of issued and returned books in respective account is possible.

## To Measure the Pollution Level in Your Locality

**Introduction:-** Lichens are widely used as environmental indicators or bio-indicators. If air is very badly polluted with sulphur dioxide there may be no lichens present, just green algae may be found. If the air is clean, shrubby, hairy and leafy lichens become abundant.

Requirment:- Rock ,Water, milk ,Yogurt.

### Procedure :-

- 1)Move rocks to a shady area in the garden.
- 2) Lichen doesn't sustain itself for long in total sunshine.  
Spray the rocks  
3)generously with a one-time liquid seaweed fertilizer, milk or yogurt. Milk is the most available and is very easy to apply.
- 4)Notice the stones darkening with lichen growth in a few weeks.

### Conclusion :-

Lichens are regarded as pollution indicators because they are sensitive to sulphur dioxide (SO<sub>2</sub>) and do not grow in polluted areas. Their presence indicates the absence of pollution in an area, and their absence indicates that the area is polluted.

## Innovating Idea Regarding Housework

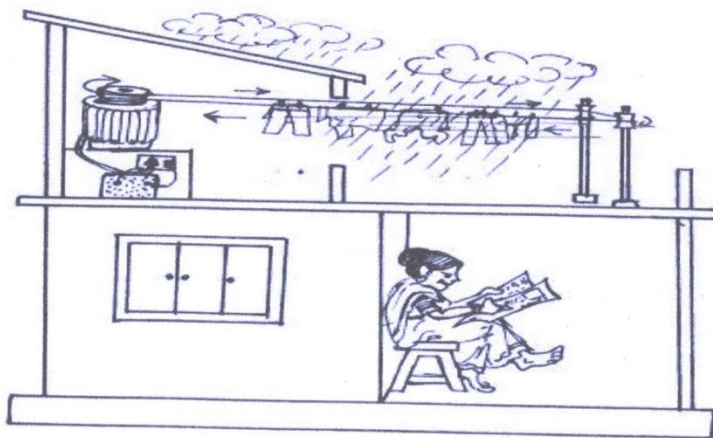

**Sub: A Cloth-line That Pulls-in Clothes when it Rains**

**Apparatus: motor, wire, salt solution, sensor, clothesline etc.**

The problem which faced by everyone in daily life that “ clothes off and putting them back on the clothesline many times in a day, especially in the rainy season.” To help save this additional chore, came up with an idea of a clothesline that has a motorized system which works on sensors.

**Procedure:**

- 1) The motor has wires that are immersed in salt.
- 2) When it rains, the salt absorbs moisture to conduct electricity. This triggers the motor.
- 3) It then pulls the rope inside on which clothes are hung.

## How To Make Earthquake Alarm

### Introduction

Earthquakes are sudden and cannot be predicted when, where and how harmful it could occur. So here is an instructable for how to make an "earthquake alarm" which could be very helpful especially at the time when people are sleeping. This earthquake alarm cannot predict about the earthquake but can warn or notify you while the earthquake is happening.

### STEP 1: MATERIAL AND TOOLS REQUIRED

- one relay (5v or 12v)
- one slide switch
- one 9v battery with connector
- one pcb standoff screw
- two screws 3mm and 1 nut
- one slide switch
- copper wire (38 swg , 1foot long)
- two red led (3mm)
- one zero pcb board
- solder and soldering iron
- glue gun
- iron sheet strip (0.5mm thick , 10cm x 1cm)
- one AA size cell
- flexible wire

### STEP 2: PENDULUM SWITCH

Take the metal sheet (you can also use thick aluminium foil ) and cut 1cm wide strip about 10 cm long.-now take the AA size cell and roll the metal strip to make a NINE (9) shape as shown in pictures.-measure about 2 cm and cut the rest of strip (still maintaining the '9' shape).

-now take the pcb standoff screw and screw up the 3mm screw into it.-take about 5cm of copper wire and make a loop shape by winding it on the standoff screw, after that solder it to make it fixed and conducting .now take the rest of copper wire and solder it to the loop on the standoff screw.now with the help of screwdriver, make a hole on the pcb for the 3mm screw and fix the screw on pcb as shown in pictures

**Process of Drug Designing and Drug Discovery**

One Day National Level workshop on The Process of Drug Designing and Drug Discovery was organized by Shri.L.T.College of Science, Akola on 4<sup>th</sup> October 2021. The objective of this workshop is to educate next-generation scientists about rational drug design, discovery & development of drugs. This workshop is an educational forum that endeavours to provide a comprehensive overview of the drug discovery process against a back drop of the technology and research revolution and includes a horizontal overview of the disciplines involved in the drug discovery process and a vertical delve in to the critical elements of each discipline.

The design and production of drugs is a field in which chemistry has had a favourable impact on life expectancy and quality over the past century. As such, this field provides a rare opportunity to introduce several concepts in chemistry and biochemistry to a large audience.

It is widely known that the design and development of a new drug generally costs more than 1 billion dollars in total and takes at least 10 years, while, despite all these efforts, only a very limited number of drug discovery projects will lead to the actual release of a new drug. Several technologies have been developed to rationalize the process by reducing duration, cost, and attrition rate, one of which is computer-aided drug design (CADD). CADD uses computing resources, algorithms, and 3D-visualization to help generate rational ideas about how to create or modify molecules, and to make decisions in the execution of the drug design process.

The workshop started with the inauguration function Prof. Ram Chavhan sir, Head department of Electronics, Shri R.L.T.College of Science, Akola and CDC member of our college was the inaugurator for this function. Dr. V.D. Nanoty, Principal Shri R.L.T.College of Science, Akola was the President of this function. DR .Lokeshkumar Gandhi, Associate Professor, SGSPS Pharmacy College Akola and Prof. S.L.Khan, Assistant Professor NBS Institute of Pharmacy Ausa, Latur, graced the Programmed.

DR.Pravin Kawle,Assistant Professor department of Chemistry conduct the inauguration programme. Dr. Poonam Agrawal, Associate Professor and Head department of Chemistry, Shri R.L.T.College of Science, and Organizing secretary of the workshop gave the introductory speech. Prof. R.G.Chavhan sir in his inaugural speech explain the need of more research in the field of Drug designing.
