INTRODUCTION:

There is no denying the fact that women in India have made a considerable progress in almost seven decades of Independence, but they still have to struggle against many handicaps and social evils in the male-dominated society. Many evil and masculine forces still prevail in the modern Indian society that resists the forward march of its women folk. It is ironical that a country, which has recently acclaimed the status of the first Asian country to accomplish its Mars mission in the maiden attempt, is positioned at the 29th rank among 146 countries across the globe on the basis of Gender Inequality Index. There has been amelioration in the position of women, but their true empowerment is still awaited. **Swami Vivekananda**, one of the greatest sons of India, quoted that, **“There is no chance for the welfare of the world unless the condition of women is improved, it is not possible for a bird to fly on only one wing.”** Therefore, the inclusion of “Women Empowerment’ as one of the prime goals.

Current Scenario on Women Empowerment -. Based on the ideas championed by our founding fathers for women empowerment, many social, economic and political provisions were incorporated in the Indian Constitution. Women in India now participate in areas such as education, sports, politics, media, art and culture, service sector and science and technology. But due to the deep- rooted patriarchal mentality in the Indian society, women are still victimized, humiliated, tortured and exploited. Even after almost seven decades of Independence, women are still subjected to discrimination in the social, economic and educational field.

Women Empowerment in India, itself elaborates that Social Rights, Political Rights, Economic stability, judicial strength and all other rights should be also equal to women. There should be no discrimination between men and woman. Women should know their fundamental and social rights which they get once they born.

- There should be respect and dignity towards Women.
- Have total independences of their own life and lifestyle inside the home and also outside at their work place.
- They should make their decision, by their own choice.
- They should have a high social respect in society.
- They have equal rights in society and other judicial works.
- They should not be discriminated while providing any type of education.

- They should select their own economic and financial choices by their own.
- There should not be any discrimination between woman and man while giving jobs and employment.
- They should have safe and secured working location with proper privacy.

Every woman in the society should be aware about her Fundamental rights and Laws written in the Indian Constitution. For this the awareness should be done or incorporated from root level i.e. from student's level. Keeping this view in mind, the one-day workshop on district level was organized on Friday dated 20/07/2018 by Shri R.L.T. College of Science, Akola in collaboration with District Police Akola, under "Janani 2" Programme 2018 and S.W.A.S. (Soldier for Women and Safety) team.
