**Report On Educational Tour To Shahnur And Narnala Fort**

**(13/12/22)**

Wildlife conservation is an important aspect of human existence. Observing wildlife is not only aesthetically pleasing but also broadens our understanding of nature. Wildlife sanctuaries are protected areas of the forest that allow the interaction between humans and the wild. Dr. V. D Nanoty, Principal, Shri R.L.T College of Science, Akola always motivates students to observe and learn from the nature. He also encourages students to be part of nature conservation organizations. Under his guidance, to promote education and learning of our wild, the Department of Microbiology & Biochemistry, Shri R.L.T College of Science, Akola organized an educational tour to Shahnur wildlife sanctuary and Narnala fort for PG students of Microbiology & Biochemistry on 13th December, 2022. Total 71 students along with 6 staff members took part in the tour. All the students and staff assembled in the college campus at 6 AM. After giving instructions to the students, the tour started at 6:30 AM and reached Narnala wildlife sanctuary at 8:30 AM. After breakfast and tea, the students along with staff and 10 trained guides started the trek of Narnala fort. Built in 10 A.D, the fort is located on the Satpuda range and offers a very beautiful view. It is the second strongest fortress after the Raigad fort. The trek is through the forest area and one can closely experience the nature while trekking. Mr. Amol Sawant from NGO Nisarg Katta extended his support throughout the tour. He informed the students about wildlife conservation and the ways we can conserve nature. He also talked about the manmade water bodies in the forest which provide drinking water for animals. He also showed the students the areas where animals are spotted. The local guides informed that the authorities of the sanctuary have made many efforts to reduce human-wildlife conflict. During the pandemic of COVID-19, about 11 villages were rehabilitated from the area to ensure peoples' safety from the wild. On Buddha purnima, i.e. 30<sup>th</sup> April, 2022, a 24-hour Machan Census was conducted to estimate the wild animals. The students were also informed about the flora and fauna of the area. After reaching the 'Mahakali Dwar' the students enjoyed the scenic beauty of the forest and the nearby areas. After returning from the adventurous trek of total 14 km, all enjoyed lunch. After lunch, the students organized a small event to showcase their talents in the form of poems and songs. They also expressed their views and learnings about the trip. All left the sanctuary at 5:30 PM after the event. On the return journey, everyone visited Gajanan Maharaj Temple (Aakoli village). All the students along with Dr. H.S Malpani (HOD), Ms. S.N Gawande, Ms. M.M Deshmukh, Ms. R.C Kadam and Mr. R.R Pachori enjoyed the tour and returned safely in Akola at 9:00 PM. The tour was conducted successfully.

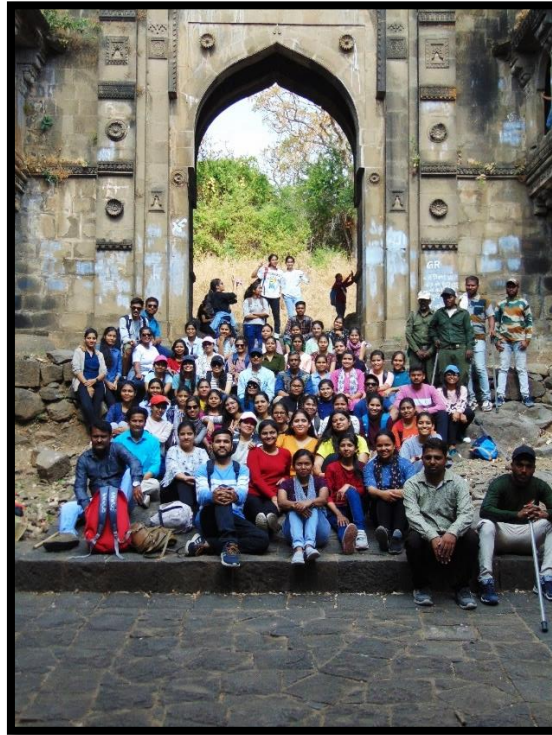

All Students And Staff At The Narnala Wildlife Sanctuary

Educational Tour (2022-23)  
Undertaking

We, the students of M.Sc Part I & Part II of Biochemistry/Microbiology Department of Shri R.L.T College of Science, Akola hereby give an undertaking that we are willingly going on the Educational tour to "Shahnour and Narnala fort" on Tuesday, 13<sup>th</sup> December, 2022 at our own risk. We declare that we will take up the whole responsibility in any circumstances of misadventure and declare that college will not be responsible for the same.
